Forecast for Wednesday 14 Jun 2023

Weather: Any early mist will clear quickly into the morning, leaving a fine day with plenty of prolonged strong sunshine. Some fair weather cloud may bubble up during the afternoon, with a very small chance of an isolated shower but staying dry for most. Remaining dry into the evening and overnight with some patchy mist perhaps forming again by dawn.

Chance of cloud-free hill tops above 600m: Greater than 95%.

Low cloud and visibility: Any early mist may briefly cover lower slopes as it lifts and clears after dawn. Very little cloud during the morning, and any cloud during the afternoon will be above all summits. Good to very good visibility, with uninterrupted panoramic views, although briefly moderate or poor in any early mist.

Meteorologist's View

High UV levels in strong sunshine and very warm temperatures even at height mean that appropriate sun protection and adequate hydration is essential.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Thursday 15 Jun 2023

Weather: Any early mist soon clearing, leaving a dry day with plenty of prolonged strong sunshine. Somewhat more fair weather cloud likely bubbling up during the afternoon, with again just the small risk of an isolated shower but remaining dry in general into the evening.

Maximum wind: Light east to south-easterly winds, 10-15mph.

Chance of cloud-free hill tops 600m: Generally greater than 95%.

Low cloud and visibility: Early mist may briefly cover lower slopes as it lifts and clears after dawn. Scattered cloud during the day will be above summits. Good to very good visibility, although briefly moderate or poor in any early mist.

Temperature: **Valleys:** Plus 13 Celsius, rising to plus 24 Celsius.
At 600m: Plus 12 Celsius, rising to plus 19 Celsius.
Freezing level: Well above all summits.
